

# Using Real-Time Analytics with AI to Align Clinical Lab and Pathologist Staffing in Advance of Daily and Weekly Changes in Patient Demand and Test Volumes

Presented by:

Curtiss McNair, Vice President / General Manager of Laboratory Services, American Oncology Network

John Moyer, Sr. Product Director, Lab Insights Division, hc1

# Agenda

- AON Vision
- Lab Industry
- Problem / Challenges of Understaffing
- hc1 Workforce Optimization
  - Origins
  - hc1 / AON Collaboration
  - How it Works
- Impact on AON
- Learnings
- Future Vision

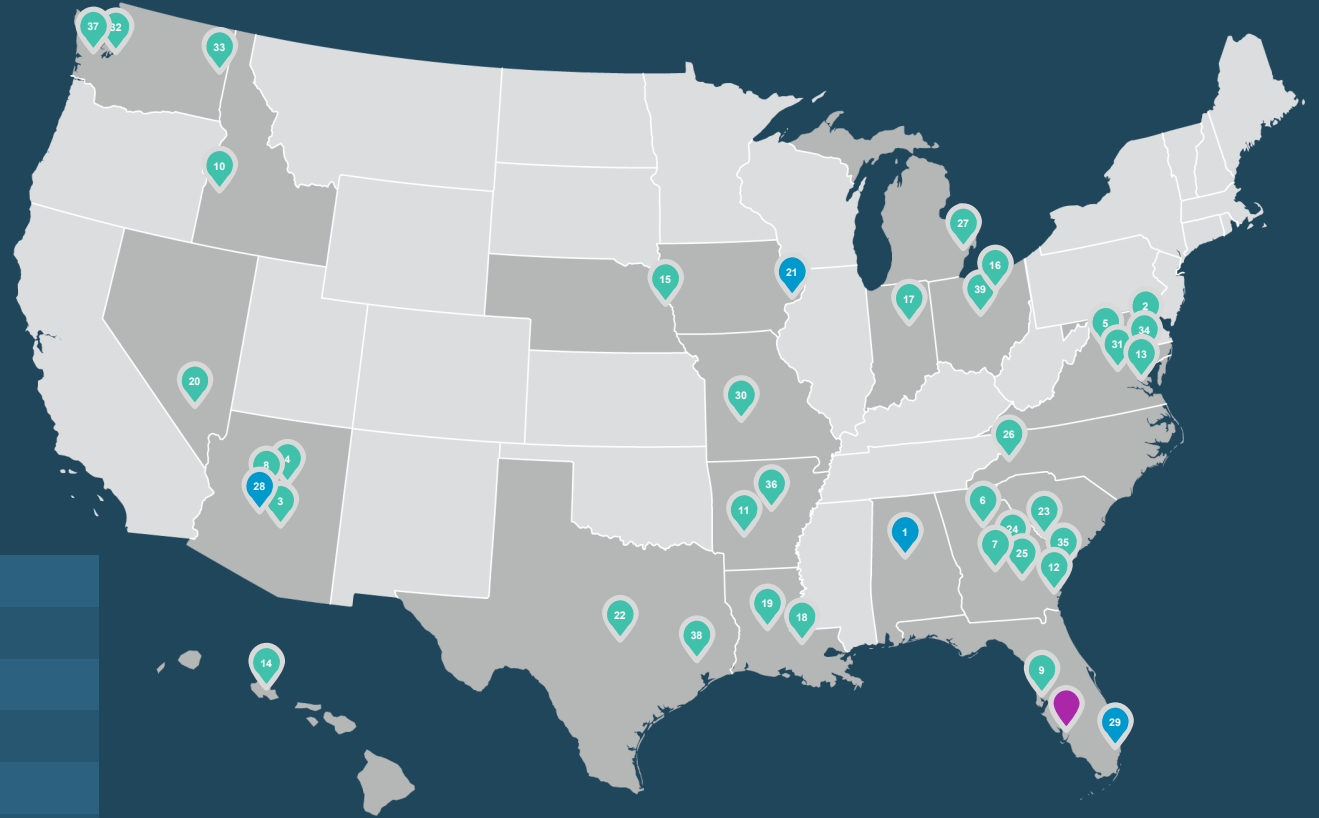

# AON Presence

- 1. Alabama Cancer Care
- 2. Bay Hematology Oncology
- 3. Cancer & Blood Specialists of Arizona
- 4. Cancer & Blood Specialists of Arizona Flagstaff
- 5. Cancer & Blood Specialists of NOVA
- 6. Cancer and Blood Specialists of Georgia
- 7. Central Georgia Cancer Care
- 8. Desert Hematology Oncology
- 9. Florida Oncology & Hematology
- 10. Gem State Cancer & Blood Specialists
- 11. Genesis Cancer & Blood Institute
- 12. Georgia Oncology Hematology Consultants
- 13. Greater Washington Oncology Associates
- 14. Hawai'i Cancer Care
- 15. Heartland Oncology & Hematology
- 16. Hematology Oncology Center
- 17. Hematology Oncology of Indiana
- 18. Hematology Oncology Clinic
- 19. Hematology Oncology Clinic Alexandria
- 20. Hope Cancer Care of Nevada
- 21. Iowa Cancer Specialists
- 22. Lone Star Oncology

- 23. Low Country Cancer Care
- 24. Low Country Cancer Care Vidalia
- 25. Low Country Cancer Care Waycross
- 26. Messino Cancer Centers
- 27. Michigan Cancer Specialists
- 28. Oncology Care Partners of Arizona
- 29. Oncology Care Partners of Florida
- 30. Oncology Hematology Associates
- 31. Oncology/Hematology of Loudoun & Reston
- 32. Panacea Oncology
- 33. Summit Cancer Centers
- 34. The Center for Cancer & Blood Disorders

- 35. Trident PET/CT of Savannah
- 36. Triple Crown Urology
- 37. Vista Oncology
- 38. Woodlands Cancer Institute
- 39. Zangmeister Cancer Center

39 Practices | 240+ Providers | 110+ Locations | 21 States

 AON Headquarters

# AON Vision: Delivering Better Care Together

- AON is one of the fastest growing networks of community oncology practices in the US.
- We are an aligned partnership of dedicated oncologists and veteran healthcare leaders working collaboratively to ensure the strength and viability of equitable cancer care in community-based settings.
- Our mission is to preserve and enhance access to the highest quality, innovative and cost-effective cancer care in the communities where our patients live.

# AON Vision: Personalized Medicine

Personalized medicine concept - uniquely identify individual need and provide that solution.

- Most expensive therapy in chemo or infusion is the wrong treatment
- Most drugs work in 4/10 people - figure out an average dose - practicing medicine to the average

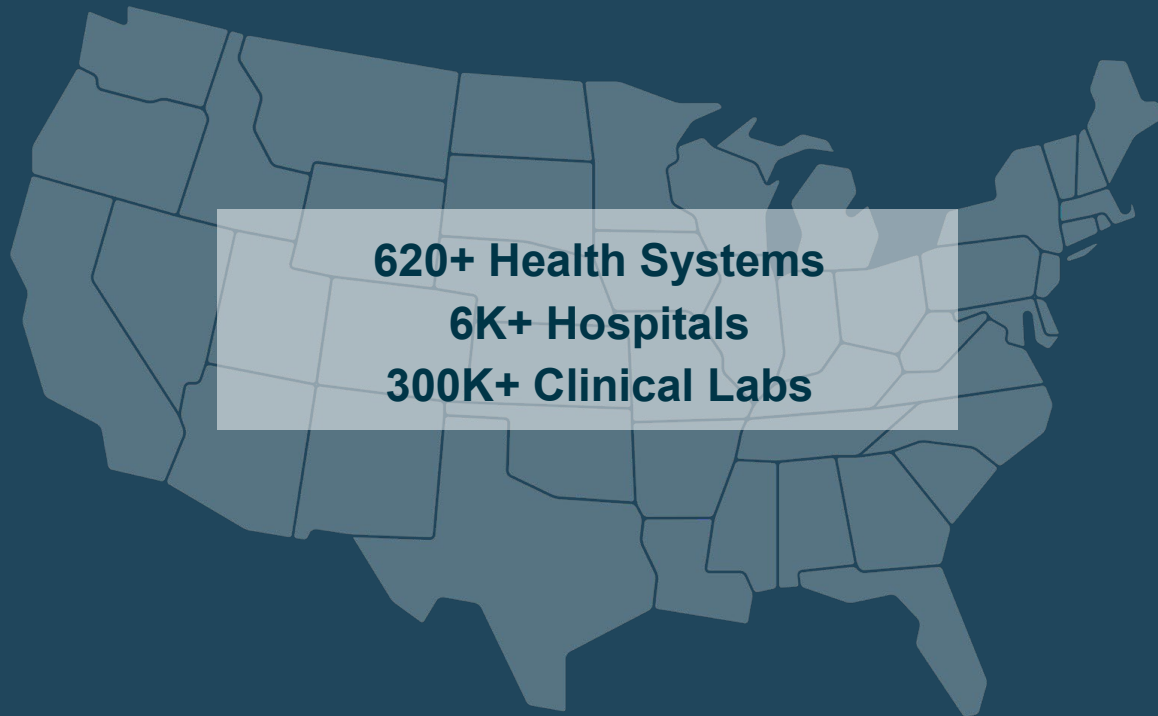

Guide workforce and what needs to be done with the patient with their treatment

- Lab operations needs to match the offering of precision medicine
- How do I use talent in the lab to get the most bang for my buck?
- Best pathway to get patient what they need in the timing they need

# The U.S. Laboratory Market

## Total Lab/Health System US Market:

## Key Insights\*

1. The U.S. clinical laboratory market was valued at \$93 billion in 2022
2. \$2B+ in Lab IT spend on LIS alone
3. Top Budget Priority: Tech investments to ease the labor shortage were cited as the top budget priority by 48% of laboratory executives

# Lab Industry Evolution

- Fewer folks going into the lab market – puts more pressure on labs
- Cultural attribute – we have to start attracting staff and we need to facilitate the care to where technology is going or we'll be behind the 8 ball
- Doing more with “less” – Doing “better” with the same and creating “more”

**“We’re preparing for the Future,  
not the Now.”**

Alti Rahman, AON Chief Strategy and Innovation Officer

- “Lab”  
Old School Ideology, Manual Processes, No Analytics
- “Lab Reloaded”  
Automated Processes, Technology
- “Lab Revolutions”  
Data, Process Revolution, Middleware
- “Lab Resurrections”  
Predictive Analytics, Enhanced Precision Laboratory Operations to match Precision Medicine, AI

# Industry Problem: Understaffing

- Lab staffing has always been an area of focus
- “Do more with less” constraints year over year
- During the pandemic, it became a more acute pain point
- Lab testing & volume returning to normal... but staffing, retention, talent acquisition still an issue

**73% of labs are currently understaffed.\***

# Three Major Challenges

**Employee burnout  
and turnover**  
*(People Impact)*

**Operational  
inefficiencies**  
*(Patient Impact)*

**Contracted and  
overtime staffing**  
*(Financial Impact)*

The average cost to hire and train a new employee is **\$8k+**.<sup>1,2</sup>

Poor TaT and delayed results can lead to a **43% treatment delay**.<sup>3</sup>

Travel Techs cost **1.5x more** than FTEs on average.<sup>4,5</sup>

# How hc1 Workforce Optimization Was Born

Pre-Pandemic

During Pandemic

Post-Pandemic

1

Staffing focus & challenges on productivity

2

hc1 Data Science team ramped up in 2019

3

COVID-19 pandemic exacerbated staffing challenges

4

Discussed ways to leverage AI/ML capabilities for staffing

5

hc1 Workforce Optimization using predictive model was born

# Collaboration to Solve “The Problem”

## The Problem

Employee burnout and professional dissatisfaction.

- Missing expansion opportunities in testing
- Inability to uncover spend/waste and staff utilization/productivity

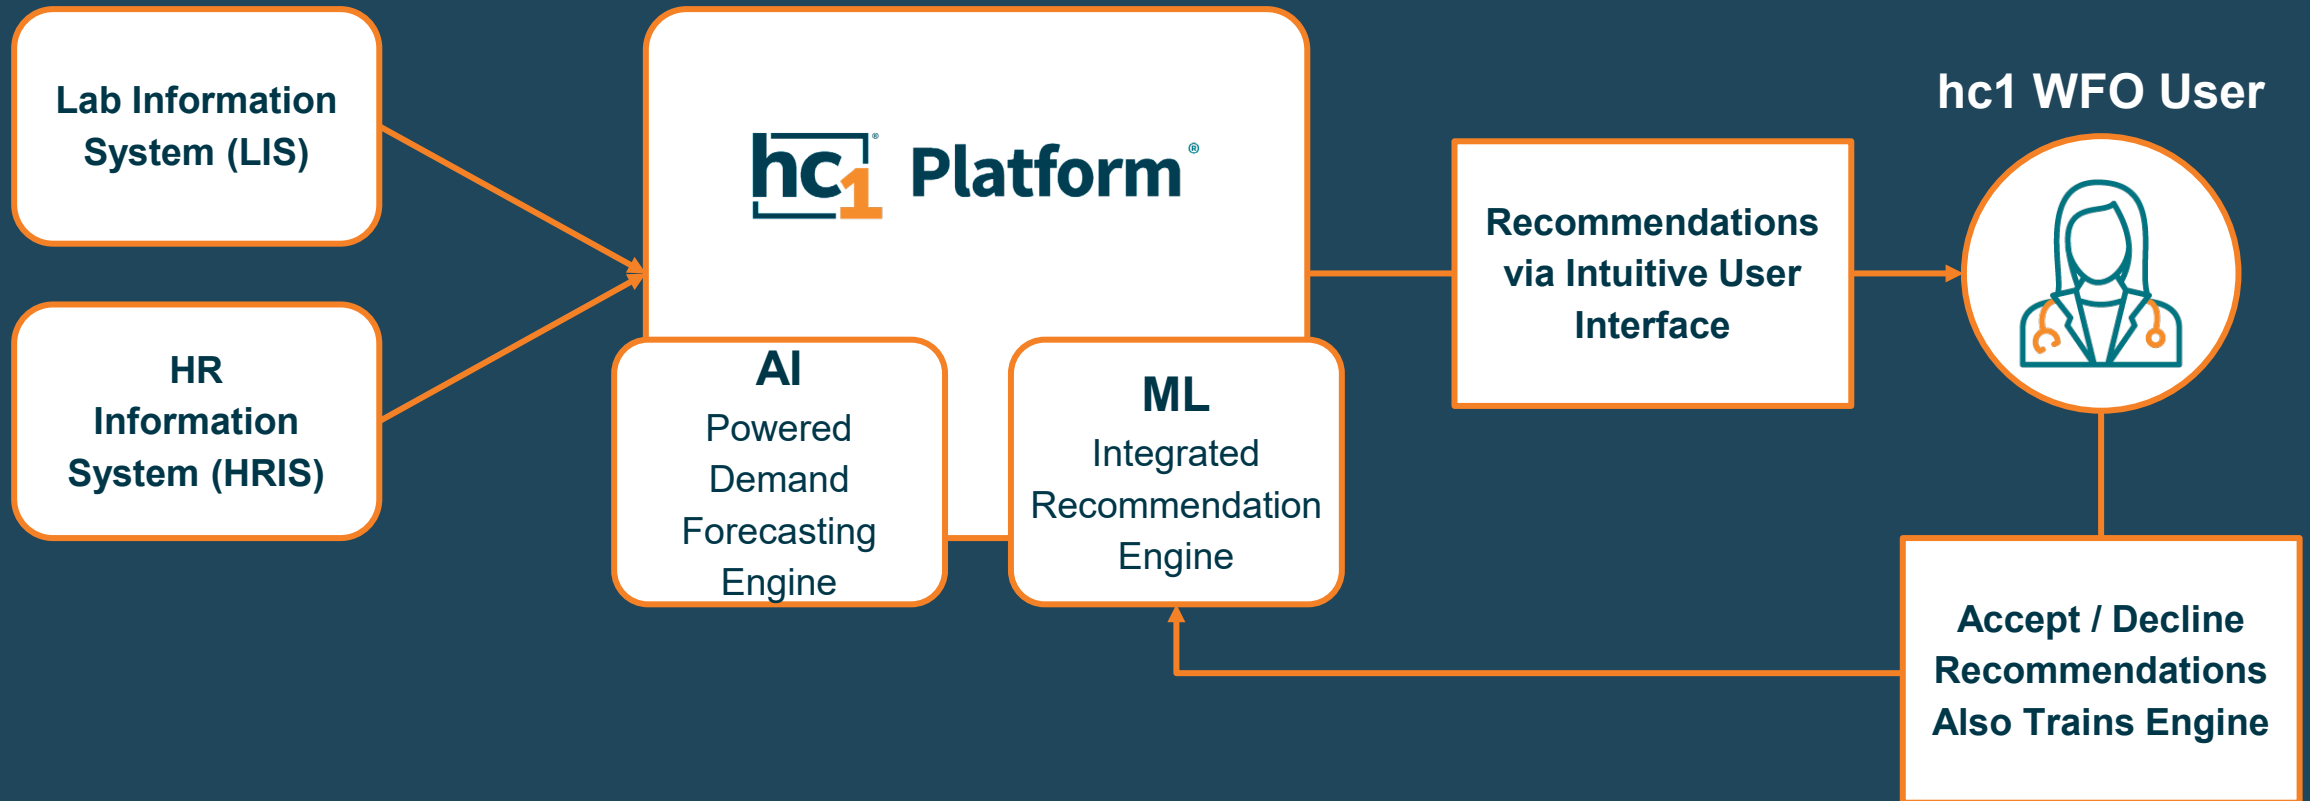

## The Results

- Satisfaction on lab KPIs
- Optimized staffing model for Ft. Myers AON lab
- Reduces costs/waste; Reallocates staff based on data points
- Real-time data analysis to optimize operational effectiveness
- Increases efficiency and productivity while remaining cost neutral
- Critical time to look at this area based on the current unpredictability
- Informed decisions based on intersection of timekeeping and lab data

# Unique Approach Using AI & ML to Drive Outcomes

Workforce Optimization uses real-time data + AI to align clinical lab & pathology staffing in anticipation of changing patient demand from week to week.

# Real-Time Data → Predictive Analytics → Actionable Recommendations

# How WFO Will Impact AON

- Helps understand DNA of workforce of my lab
- Pathology processes hard to quantify
  - Case assignment
  - Skillset assessment
  - Quality
  - TaT
- Tailor-made oncology lab approach for our tailor-made infusion solutions (Precision Medicine).
- “Trifecta”
  - Lab Operations (all staffing levels) – Effective workflow across all departments
  - “3P” – People, Process, Product (Physicians/Providers/Patients)
  - Bottom Line – Efficiencies, Cost consciousness (resources)

# What We've Learned

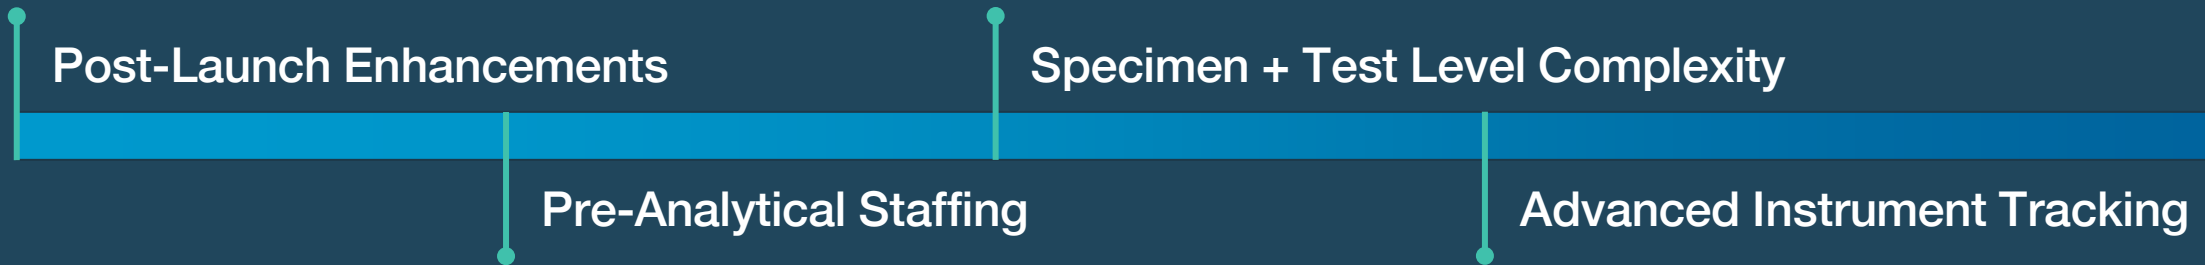

- Outside the box thinking needed
- The way we “usually” do it mentality
- Workforce (talent) changed....work ethic changed
- Resources and processes didn't match need
- Target moved from Generalized to Precision Medicine

# Vision for the Future

- Expansion beyond core lab – becomes even more critical to implement more of this automation and technology.
  - Need to assess preanalytical lab process (outputs are only as good as the inputs)
  - Need data and metrics around decentralized lab testing and processes
  - “Predictive Logistics” – predetermining how samples are transported depending on geographic area

## hc1 Workforce Optimization Roadmap

# Q&A

Laboratory

RIGHT PATIENT.  
RIGHT TEST.  
RIGHT PRESCRIPTION.®
